ASIAN ALTERNATIVE FUND SPECIALISTS FORM STRATEGIC ALLIANCE

Quality Risk Management & Operations (QRMO) and Skye Fund Services are pleased to announce their strategic alliance in offering a streamlined, comprehensive suite of products to alternative investment fund managers across Asia Pacific, effective immediately.

With this strategic alliance, Skye and QRMO will offer a one-stop shop solution to fund managers, especially in the hedge fund and fund of hedge funds space. A product suite combining Skye's signature administration and middle office services with QRMO's acclaimed middle/back office, risk management and independent third party valuation services will for the first time offer fund managers in the small-mid tier segment a one-stop shop solution for all risk, middle- and back-end requirements.

Angus Hung, Managing Partner and Co-Founder of QRMO stated, "We are extremely delighted to have this opportunity to join hands with Skye in offering such a comprehensive suite of services. As investors are demanding more transparency and disclosure from hedge fund managers, there are growing calls for alternative investment providers to break away from the status quo and step up the level of reporting and the range of services provided. We believe the timing is right for us and we highly look forward to building a solid client base with Skye."

Javed Rahman, CEO of Skye, reiterated, "We believe we are the only provider in the small to mid tier segment to offer a solution that is as expansive and comprehensive, allowing fund managers to focus on their core capabilities of growing assets. We always have had great respect in QRMO's capability in the space and are glad that we are able to join our forces to offer a product suite that is seamless and value-added." He adds, "We believe our customers can save money by outsourcing all non-core, but critical responsibilities to us."

#

About QRMO:

Quality Risk Management & Operations (QRMO) Limited is an independent financial services company providing specialized outsourcing solutions in the areas of risk management, middle- and back-office.
